

COMMANDO² 40[®]

HIGH PERFORMANCE DRY ICE BLASTERS

The **COMMANDO[®] 40 and 40 PRO** All Pneumatic Dry Ice Blasting Machines are portable dry ice blasting workhorses requiring only compressed air for operation. Built to tackle tough industrial cleaning applications, they provide an efficient method to clean a wide variety of surfaces using dry ice pellets. **The machines can even function with standard shop air** (with a 1" air supply line)! Both machines feature a removable spun stainless steel hopper with the BlitzFeed™ patented freezeless dry ice delivery system. The COMMANDO[®] 40 is a "run & gun" model ideal for many industrial applications, such as sanitary cleaning of food processing facilities and removing grease and grime from production equipment.

For heavy duty applications requiring more blasting power, the COMMANDO[®] 40 PRO model features a higher blasting velocity with additional machine controls, including an adjustable pellet feed rate. It is recommended for cleaning and restoration professionals requiring a lightweight and portable machine.
